***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the invention of a planetary gearing that includes a carrier with receiving holes formed on a circumference about the rotational axis of the gearing, a plurality of planetary gears rotatably received in the holes and engaging a sun gear and an inner gear, the planetary gears having helical teeth, and wherein an engaging phase of at least one planetary gear with respect to the inner gear and sun gear is different than the engaging phases of the other planetary gears.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed October 20, 2003. None of the references show all of the features of the claimed invention.

The reference cited by the examiner is deemed to be pertinent to applicant's disclosure. Baker '222 shows a planetary gearing with different angles between the planet gears, and thus they engage with the sun gear at different phases. Baker does not show a carrier with receiving holes as claimed. It would not have been obvious to one of ordinary skill in this art to modify

Art Unit: 3681

Baker to provide such receiving holes because a motivation to do so could not be found in the prior art.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
